QUANTO-ANALYTICS

QUANTO-ANALYTICS offers relevant functions to analyze the use of SAP Fiori applications in the SAP Fiori Launchpad. Data is collected, analyzed and visualized to identify important patterns in the digital channels. The knowledge gained forms the basis for important improvements in the user experience.

QUANTO-ANALYTICS is currently available as a first version. We are constantly developing the product together with our clients in order to optimize it according to the requirements of the users.

QUANTO
SOLUTIONS

QUANTO-ANALYTICS

Your Advantages

The most important information on one page directly in SAP Fiori Launchpad.

By clicking on a card, the detailed view with further information is displayed.

Clear visualization of all relevant data in tables and diagrams.

Filter, sort and group all displayed data.

QUANTO-ANALYTICS

Our features

Errors occured
Showing all errors that have occurred with the relevant information

Browsers used
Comparison of browsers used by end users

Duration of service calls
Showing the response duration from service calls

App usage time
How long do users stay in individual applications

Service usage
Which service is called how often and at what time

Service traffic
Showing the response size of service calls
