# QUANTO ANALYTICS

QUANTO-ANALYTICS offers relevant functions to analyze the usage of SAP Fiori Apps in the SAP Fiori Launchpad.

Using intelligent programs and logic, we collect the relevant data, analyze it and present it in a meaningful way. In this way, relevant patterns can be identified. The insights gained are the basis for important improvements to the user experience.

QUANTO ANALYTICS

Features

QUANTO-ANALYTICS allows you to resolve not only the following questions.

Error-Log
What errors occurred where and how often?

Browser
Which browsers do users prefer?

Response Latency
What is the response time for the service?

Duration of Use
What applications are used for how long?

Requests
What services are invoked, how often, and when?

Response Size
What is the average size of the response?

Languages
What languages are in use and how often?

Call Location
Where was the Fiori launchpad called from?

Themes
Which themes are preferred by users?

User Count
What is the user count of the Fiori apps?

QUANTO ANALYTICS

Final Facts

QUANTO-ANALYTICS is a perfect fit for SAP R/3, ECC and S/4HANA systems - whether on-premises or in the cloud.

Our monitoring and analysis solution is installed on the SAP Gateway. The front-end is provided either on the SAP Fiori front-end server of your SAP Gateway or alternatively on SAP NEO or SAP Cloud Foundry. Configuration is easy and user-friendly via the SAP Fiori Launchpad.

QUANTO-ANALYTICS is currently available in version 1.2. The functionality and user-friendliness of the product are continuously improved in collaboration with our customers.

QUANTO-ANALYTICS makes your UX a success.
